Summary

- Demonstrated expertise with **Flutter** framework over the past 5+ Years of contributing to development and enhancement of mobile applications.
- Proven proficiency in implementing robust form validation techniques and seamlessly integrating on **RESTful API's** to ensure optimal functionality and user experience,
- Strong Knowledge in Design, Developing and Testing multiple Mobile application combining to range of Technologies & Multiple Platform (Android, Ios, Web).

Skills

- **Languages** : Dart, JavaScript • **Frameworks** : Flutter, Angular • **Graphic Tool** : Figma
- **Web-Tools** : GitHub, Bit-bucket, Postman • **State-Management** : Provider, Getx, Bloc.
- **Testing** : Widget-testing, Unit-testing.

Work Experience

HclTech | Lead Engineer

-May 2024 to Present

- Hands-on experience in writing robust **Unit and Widget test** cases in Flutter to ensure app reliability, performance, and maintainability
- Executed CRUD operations in **MongoDB**, managing data persistence and enhancing application functionality.
- Developed a Mobile application, worked on Raw XML data to dynamically update the control application parameters, improving flexibility.
- Utilized **Provider** State Management for architect scalable and maintainable application, enhancing performance and ensuring efficient data flow.
- Designed and automated end-to-end **CI/CD** pipelines using Jenkins, integrating code builds, automated testing, and deployment workflows.

Sandsquare | Senior Software Engineer

-Mar 2023 to May 2024

- Implemented **state management** in my Flutter app using **GetX**, streamlining the application's data flow and ensuring efficient state handling, resulting in a smoother and more responsive user experience.
- Successfully executed **SSL pinning** in API implementation, bolstering the security of data transactions and establishing a robust and secure communication channel for the application.
- Successfully integrated **Firebase** to enable seamless push notifications and robust analytics within the app, enhancing user engagement and providing valuable insights into user behaviour.
- Developed and implemented **Stripe** payment gateway integration, including payment intents, webhooks, and secure transaction handling..
- Crafted a comprehensive **sequence diagram** illustrating the intricate flow and concepts of the entire application, providing a visual guide to understand the intricate interactions and dependencies within the system.
- Crafted a comprehensive **sequence diagram** illustrating the intricate flow and concepts of the entire application, providing a visual guide to understand the intricate interactions and dependencies within the system.

- Designed and developed a customised enterprise user application using **Flutter**, implementing tailored **UI** designs and robust validation processes to ensure a seamless and secure user experience.
- Explored extensive knowledge in the **Nodejs**, leveraging it to create APIs for seamless data migration from the database to the client, facilitating efficient and secure data exchange
- Optimized app performance by integrating **GetX** lightweight and reactive state management, reducing unnecessary widget rebuilds and improving overall responsiveness.
- Configured dynamic and **Deep Linking** within **FlutterFlow**, ensuring smooth redirection to specific in-app screens across Android and iOS.

- I bring a wealth of experience in **website** creation, with a strong foundation in web technologies such as **HTML**, **CSS**, and **JavaScript**. My expertise lies in seamlessly combining these technologies to craft engaging and responsive web experiences.
- Exploring mobile technology through **Flutter** UI development, with a focus on implementing intuitive user interfaces and incorporating fundamental validation techniques for enhanced application reliability.
- Streamlined **Firebase** integration in **FlutterFlow**, enabling quick setup of Authentication, **Firestore**, and Storage without complex manual configuration.
- Experienced in creating responsive, visually consistent layouts in **FlutterFlow** with custom components and optimized user flows.
